

## KARTA PRZEDMIOTU

Nazwa przedmiotu: English for material engineering (WTCNOCSI-EfME2)

Nazwa w języku polskim:

Nazwa w jęz. angielskim: English for materials engineering

### Dane dotyczące przedmiotu:

Jednostka oferująca przedmiot: Wydział Nowych Technologii i Chemii

Przedmiot dla jednostki: Wydział Nowych Technologii i Chemii

Cykl dydaktyczny: Semestr zimowy 2025/2026

Koordynator przedmiotu cyklu: dr hab. Noureddine Bennis

### Domyślny typ protokołu dla przedmiotu:

Zaliczenie na ocenę

### Język wykładowy:

angielski

### Skrócony opis:

This course is intended for student of material engineering. The subject has been chosen to include, description of specific materials emphasizing technical advantages, simplifying and illustrating technical explanation of material engineering. The focus in this syllabus is on skill development, fostering ideas and practice of language skills in various contexts of material engineering. The teaching effect of this course will give the student sufficient English vocabulary connected with structure properties and application of structural materials.

### Opis:

SEMESTR V

1. Examples of written and spoken description of scientific and technological topics related to materials engineering. Analysis of popularized scientific texts oriented towards understanding of English applied in materials engineering. Oral presentations of some chosen topics connected with scientific interest of a student.
2. Electric and magnetic properties of matter.
3. Energy band theory of matter. Lasers. Technological and scientific applications of laser light.
4. Measurement techniques. Description of technological properties of some measuring devices, especially the characteristics of electronic measurement instruments. Discussion of the measurements' precision. Error calculus. Standard deviations and other ways of estimation of accuracy of measurements.
5. Presentation of a laboratory set-up for measurements of a chosen quantity related to chemistry or materials science. Characteristics of the structural components of the arrangement and the principle of its operation.
6. Basic English nomenclature within the range of instrumental analysis, as well as in electronics, information technology, and optoelectronics.
7. Modern technologies. Directions of technological development. Nanotechnology.
8. Methodology of presentation of research results in the form of a paper and a poster. Components of a paper.
9. Oral presentations concerning description of some chosen problems of materials.
10. Conference English. Typical expressions. Examples of conference appearances.

### Literatura:

Podstawowa:

1. P. Domański, English in Science and Technology, WNT, 1993.
2. L. Szkutnik, An Introductory Course in Scientific English, PWN, 1978.
3. R. Macpherson, University English, Wydawnictwa Szkolne i Pedagogiczne, 1994.
4. E. B. Uvarov, A. Isaacs, Dictionary of Science, The Penguin, 1993.
5. David. W. A. Sharp, The Penguin Dictionary of Chemistry, 1991.

Uzupełniająca:

1. P. Atkins & J. de Paula, Physical Chemistry, Oxford University Press, 2005

### Efekty uczenia się:

Symbol / Efekty uczenia się / Odniesienie do efektów kierunku

W1 / Student will have sufficient English vocabulary in the range of material structure, notions related to phase transformations. Student will be familiar with the way of describing structural parameters. / K\_W02,

W2 / Student will have basic English vocabulary connected with structure, properties and application of the structural materials. Student can write in English research reports about characteristic of various structural materials and their development trends. K\_W02

W3 / Student will know the general chemical, mathematical and physical terminology necessary to translate papers related to scientific and technological issues / K\_W02, K\_W017

U1 / Student can collect data from literature, data bases and other information resources. Furthermore can analyze and interpret obtained information as well as formulate and justify opinion in the range of materials science./ K\_U01

U2 / Student will have the ability to present scientific and technological issues both in written and oral way as well as to describe results of scientific research / K\_U015

U3 / Student will be able to prepare an oral presentation in English related to specific subject./ K\_U10

U4 / Student can present scientific and technological issues in the form of publications, lectures and conference appearances / K\_U15

K1 / Student can collaborate with a group and participate taking different roles. / K\_K05

### Metody i kryteria oceniania:

The subject is credited under condition of the positive results of the oral seminar presentation of a chosen problem in English within the range of electronics and its consequent preparation for publication in a scientific journal.

The final mark is the arithmetical average of the marks obtained for the two requirements mentioned above.

Accomplishment of the effects W1, W2, W3, W4, U3, U4, K1 is verified during the oral presentation and during formulation and preparation of the paper.

mark 2 – less than 50% of the required knowledge;

mark 3 – 50 ÷ 60% of the required knowledge;

mark 3,5 – 61 ÷ 70% of the required knowledge;

mark 4 – 71 ÷ 80% of the required knowledge;

mark 4,5 – 81 ÷ 90% of the required knowledge;  
mark 5 – more than 91% of the required knowledge.

Mark 5 is given to a student who has acquired knowledge, skills and competencies contained in the teaching results system, is competent and consistent in the knowledge acquirement process.

Mark 4 is given to a student who has acquired knowledge, skills and competencies contained in the teaching results system on a good level.

Mark 3 is given to a student who has acquired knowledge, skills and competencies contained in the teaching results system on a satisfactory level.

Mark 2 is given to a student who has not acquired the basic knowledge, skills and competencies contained in the teaching results system and has not accomplished the necessary requirements.

**Forma studiów**

stacjonarne

**Rodzaj studiów**

I stopnia

**Rodzaj przedmiotu**

wybieralny

**Przedmioty wprowadzające**

Fizyka 1, 2 – general physics at basic level of a technical university  
Matematyka 1, 2, 3 – general mathematics at basic level of a technical university  
Język obcy – english within the range of secondary comprehensive school

**Programy**

kierunek: inżynieria materiałowa, specjalność: Inżynieria fotoniczna

**Forma zajęć liczba godzin/rygor**

C 30/+

**Autor**

dr hab. Noureddine BENNIS

**Bilans ECTS**

Lp. Aktywność Obciążenie w godz.

1. Udział w wykładach
  2. Udział w laboratoriach
  3. Udział w ćwiczeniach 30
  4. Udział w seminariach
  5. Samodzielne studiowanie tematyki wykładów
  6. Samodzielne przygotowanie do laboratoriów
  7. Samodzielne przygotowanie do ćwiczeń 48
  8. Samodzielne przygotowanie do seminarium
  9. Realizacja projektu
  10. Udział w konsultacjach 8
  11. Przygotowanie do egzaminu
  12. Przygotowanie do zaliczenia 4
  13. Udział w egzaminie
- godz.; ECTS

Sumaryczne obciążenie pracą studenta: 90; 3,0

Zajęcia z udziałem nauczycieli: 1+2+3+4+9+10+13: 30; 1,0

Zajęcia powiązane z działalnością naukową: 60; 2,0
